DETAILED ACTION

Claims 1-13 are currently pending.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, in part, drawn to a compound of

Group II, claim(s) 5, 6, 9, and 10, in part, drawn to an electrographic photoreceptor using the compound of Group I.

Group III, claim(s) 1 and 3, in part, drawn to a compound of

Group IV, claim(s) 5, 7, 9, and 11, in part, drawn to an electrographic photoreceptor using the compound of Group III.

Art Unit: 1609

Group V, claim(s) 1 and 4, in part, drawn to a compound of

Group VI, claim(s) 5, 8, 9, and 12, in part, drawn to an electrographic photoreceptor using the compound of Group III.

Group VII-IX, claim(s) 13, in part, drawn to an apparatus using the invention of Group II, IV, or VI, respectively.

2. The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The structural feature common to all of the claims is , which is not a contribution over the prior art. For example, the prior art of US 6,268,095 teaches the

compound:

which share the same structural feature as the pending claims. Therefore, the technical feature linking the claims does not constitute a special technical feature under PCT Rule 13.2. Accordingly, the claims lack unity of invention, and restriction is proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1609

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
